

ELEYEEN AHMED

REACT NATIVE DEVELOPER · MOBILE ARCHITECT

Islamabad, Pakistan | +92 310 9724117 | eleenawan69@gmail.com | eleveen-portfolio.vercel.app | github.com/Eleyeen | [LinkedIn](#)

SUMMARY

React Native engineer with 3+ years shipping production, store-published mobile applications across logistics, campus commerce, wellness, real estate, and live-event discovery. Deep expertise in React Native, Expo, TypeScript, Firebase, and REST/GraphQL integration, with a track record of owning architecture decisions, driving feature delivery, and taking apps from zero to App Store / Google Play release. Focused on clean, modular architecture, measurable performance gains, and maintainable codebases at scale.

WORK EXPERIENCE

React Native Developer

Jan 2026 – Present

Vorixa Solutions (JanBark Technologies) — Islamabad, Pakistan

- Develop and maintain scalable, production cross-platform mobile applications using React Native and TypeScript.
- Own REST API integration, authentication systems, and backend service connections end to end.
- Implement push notifications and real-time features using Firebase Cloud Messaging and Firestore.
- Diagnose and resolve production performance issues, reducing crash rates and improving app responsiveness.
- Collaborate directly with designers and backend engineers to ship high-quality, store-ready features.

React Native Developer

Oct 2024 – Dec 2025

Poshmaal Technologies

- Delivered production-level React Native applications for connected product experiences end to end.
- Integrated REST APIs and managed complex application state efficiently using Redux Toolkit and Context API.
- Improved application performance and polished UX across core user flows.
- Built reusable, well-documented components and maintained a scalable codebase structure.

React Native Developer

Mar 2023 – Aug 2024

AH Group (RealtorsPK)

- Built real estate mobile applications from the ground up using React Native, including full Firebase authentication and push notification pipelines.
- Designed responsive, reusable UI components used across multiple app modules.
- Successfully deployed applications to both the App Store and Google Play Store.
- Improved app performance and reduced production bugs through systematic optimization.

Mobile Application Developer (React Native & Flutter)

Jan 2022 – Feb 2023

Softtech Square

- Developed and maintained cross-platform mobile applications across React Native and Flutter.
- Integrated Firebase services including Authentication and Firestore for real-time data handling.
- Built reusable UI components and improved application performance across Android and iOS.

Mobile Application Developer Intern

Aug 2021 – Dec 2021

ApTechMedia — IT Park Peshawar

- Assisted in developing mobile applications using React Native under senior engineer guidance.
- Integrated authentication and core API features into production codebases.
- Learned mobile development architecture, code review practices, and industry best practices.

SELECTED PUBLISHED APPS

ZoomedXL Courier

2025 · iOS / Android

On-demand courier logistics app connecting independent contractors to flexible local and regional delivery routes. Built with React Native, TypeScript, GPS/Maps, push notifications, and REST APIs.

Siply

AI-assisted hydration and food-aware water tracking app with Apple Health sync, AI coaching, push reminders, and subscription (RevenueCat / IAP) integration.

2026 · iOS

LiveMusic Local

Local live-music discovery app for finding concerts, gigs, and venues nearby, with favorites, alerts, push notifications, and in-app subscriptions.

2026 · iOS / Android

Udlivery

University campus delivery marketplace for dining hall food, packages, and peer-to-peer drop-offs, built with React Native, Maps, and payment integration.

2022 – 2026 · iOS / Android

SKILLS

React Native (Expert)	Expo	TypeScript / JavaScript
Redux Toolkit / Zustand	React Query	Context API
REST & GraphQL APIs	Firebase (Auth, Firestore, FCM)	Socket.io / Real-time
Push Notifications	In-App Purchases / RevenueCat	Maps & GPS Integration
App Architecture & Modular Design	Performance Optimization	CI/CD & Release Pipelines
Flutter	Android Studio / Xcode	Git & GitHub
App Store & Google Play Deployment	Debugging & Profiling	Cross-platform UX

EDUCATION

Bachelor of Computer Science — Agriculture University, Peshawar (Jan 2020 – Feb 2024)
FSc (Computer Science) — Quaid-e-Azam Degree College (Jan 2018 – Feb 2020)

ACHIEVEMENTS

- Shipped 6+ published apps to the App Store and Google Play Store, serving users across 4+ countries.
- Delivered 12+ mobile products spanning logistics, wellness, real estate, and consumer discovery.
- Implemented Firebase authentication, push notifications, and real-time features across multiple production apps.
- Designed scalable, modular React Native architectures adopted across teams.
